

SECURITY ASSESSMENT REPORT: COMPREHENSIVE

Target Asset: www.itsecgames.com

Report ID: RPT-2026-E8EE8859 | Generated: 2026-09-04T06:03:30

OVERALL STATUS: IMMEDIATE ACTION REQUIRED

Potential vulnerabilities or threat indicators were detected during scanning. Follow the action plan on Page 2 to secure this asset.

THREAT SCORE	SEVERITY LEVEL	EVIDENCE CONFIDENCE	THREAT CATEGORY
35 / 100	CRITICAL	75%	CRITICAL

1. EXECUTIVE SUMMARY & BUSINESS IMPACT

The target website uses a self-signed SSL certificate for HTTPS (port 443) causing certificate verification failures and man-in-the-middle vulnerabilities. Additionally, critical security headers (HSTS, CSP, X-Frame-Options, X-Content-Type-Options) are missing, exposing the site to cross-site scripting, clickjacking, and MIME sniffing

2. SECURITY COMPONENTS & TELEMETRY VERIFIED

? Threat Intelligence:	NOT_AVAILABLE	? File Analyzer:	NOT_AVAILABLE
? Ssl Scanner:	NOT_AVAILABLE	? Whois Lookup:	NOT_AVAILABLE
? Url Scanner:	NOT_AVAILABLE	? Port Scanner:	NOT_AVAILABLE

3. AUTONOMOUS AI AGENT CORRELATION

Autonomous AI Agent analysis was not linked for this report generation.

4. DETAILED SECURITY FINDINGS & EVIDENCE

Identified security indicators with both business impact and technical detail.

[LOW] Security Observation: Port 22

Open service or port detected on target: 22

Technical Context: Verified via automated CyberGuardian security rule evaluation.

[LOW] Security Observation: Port 80

Open service or port detected on target: 80

Technical Context: Verified via automated CyberGuardian security rule evaluation.

[LOW] Security Observation: Port 443

Open service or port detected on target: 443

Technical Context: Verified via automated CyberGuardian security rule evaluation.

5. RECOMMENDED ACTION PLAN & REMEDIATION PLAYBOOK

Clear, prioritized steps to resolve identified vulnerabilities and harden your systems.

1 Action Step 1: Install a valid SSL certificate from a trusted certificate authority to replace the self-signed certificate

2 Action Step 2: Implement Strict-Transport-Security (HSTS), Content-Security-Policy (CSP), X-Frame-Options, and X-Content-Type-Options headers

3 Action Step 3: Configure HTTP redirect to HTTPS to enforce secure communication and prevent downgrade attacks
